MEETINGS OF SCIENTIFIC BODIES

During the ensuing week.

MONDAY, June 2. — *Entomological*, 17, Old Bond-street, 8 P.M.; *United Service Institution*, Whitehall Yard, 9 P.M.

TUESDAY, 3.—*Linnæan*, Soho-square, 8 P.M.; *Horticultural*, 21, Regent-street, 3 P.M.; *Civil Engineers*, 25, Great George-street, 8 P.M.

WEDNESDAY, 4.—*Society of Arts*, Adelphi, 8 P.M.

THURSDAY, 5. — *Royal*, Somerset-house, 8½ P.M.; *Antiquaries*, Somerset-house, 8 P.M.; *Zoological*, Hanover-Square, 3 P.M.

FRIDAY, 6. — *Royal Institution*, Albemarle-street, 8½ P.M.; *Botanical*, 20, Bedford-street, Covent Garden, 8 P.M.

SATURDAY, 7. — *Asiatic*, 14, Grafton-street, 2 P.M.

ADVERTISEMENTS.

ROYAL POLYTECHNIC INSTITUTION.—The ATMOSPHERIC RAILWAY exhibited by a Working Model, having a power to carry visitors. A CURIOUS MECHANICAL HAND on a person who has lost his natural hand. Dr. RYAN'S LECTURES on the CHEMISTRY of DOMESTIC LIFE daily, at a quarter past Three, and on Wednesday and Friday evenings at a quarter to Nine. Professor BACHHOFFNER'S varied LECTURES with brilliant Experiments. Lectures on Character, with Musical Illustrations, by Mr. J. Russell, accompanied by Dr. Wallis on the Piano-forte, on the evenings of Monday, Tuesday, and Thursday, at Eight o'clock. New and beautiful objects in the CHROMATROPE, PHYSIOSCOPE, PROTEUSCOPE, &c. NEW DISSOLVING VIEWS. SUBMARINE EXPERIMENTS by the DIVER and DIVING BELL. Working Models described daily.

Admission, 1s.; Schools, half-price.

WHITE KNIGHTS' PARK.

THE BOTANIC GARDENS and WILDERNESS of this celebrated Domain will be OPEN for the admission of the Public, during the Summer season, on MONDAYS and THURSDAYS. Tickets of Admission, ONE SHILLING each person, and Family Tickets, to admit eight, FIVE SHILLINGS, may be obtained of Messrs. Scott and Moffatt, Architects, 20, Spring Gardens; of Mr. Frederick Chinnock, Estate Agency Office, 2a, Regent-street; at the Offices of "The Builder," No. 2, York-street, Covent-garden, and "The Gardener's Gazette;" of Messrs. Richards and Rogers, Solicitors, 10, Friar-street, Reading; and at Mr. Welch's "Berks Chronicle" Office, 12, Market-place, Reading.—Day Tickets to Reading are issued by the Great Western Railway.

PATENT HANDRAILS. — J. MELVILLE, after upwards of Twenty Years' experience in the Manufacture of the above, can now, with confidence, recommend them to Architects and Builders, combining Beauty and Durability; avoiding heading joints, and the grain of the wood continued throughout the wreathed, or otherwise circular parts. They are now patronised by the most eminent Architects, to whom reference can be given.—Specimens and prices sent to Architects or Builders, in Town or Country. Columns Veneered, Pew Capping, &c.—No. 64, John-street, Fitzroy-square, London.

DUTY OFF ORNAMENTAL WINDOW GLASS.

CHARLES LONG begs to inform his Friends and the Public, that he can now supply Ornamental Glass from 1s. 3d. per foot superficial; and borders from 9d. per foot, run; and having just built two of the largest Kilns in London, is enabled to execute extensive Orders with unprecedented dispatch, 7, King-street, Portman-square.—Terms, Cash only.

DUTY off WINDOW GLASS. — On April the 6th, Squares stouter and of better make than formerly for Glazing purposes at 6d. per foot.

NURSERYMEN, MARKET GARDENERS, AND OTHERS requiring Small Glass, will find a greater variety of sizes (a large Stock of which is constantly on hand) than is kept by any other house in London, from 4d. per foot. Flattened Sheet, Stained, Fluted, the BIRMINGHAM Sheet Plate (superior in all respects to every other make), and Ornamental Glass of every description. Complete Lists of Glass, Lead, Colours, &c., at ready-money prices, may be had (gratis) on application to R. Cogan, at the Western Glass, Lead, and Colour Warehouse, 3, Princes-street, Leicester-square, London.

SURVEYORS, CONTRACTORS FOR PUBLIC WORKS, and the TRADE generally, sending specifications of quantities required, will receive by return of post an invoice at the very lowest cash prices.

A parcel of very Superior Spruce Oker, suitable for PLASTERERS AND PAINTERS, to be sold at 6s. per cwt.

MARTIN'S PATENT CEMENT.

TO ARCHITECTS, BUILDERS, AND PAINTERS IN FRESCO.

STEVENS and SON, PATENTEES and SOLE MANUFACTURERS, beg respectfully to announce that this beautiful cement has now arrived at a degree of excellence far surpassing their most sanguine expectations. For all Internal work it possesses a great superiority over every article hitherto in use; it is now being used externally by Government in the British Museum and other public buildings. IT DOES NOT THROW OUT ANY SALT, but presents a beautifully plain and perfect surface, which may be painted upon dry work within four days without peeling. It is equally applicable for walls or lath, for mouldings, architraves, skirting, or flooring; and is admitted to form the best ground for fresco painting, having been used for many of the prize frescos lately exhibiting in Westminster Hall. It will bear an intense heat without cracking, and for hardness, durability, and economy, cannot be equalled.

196, DRURY-LANE, LONDON.

Agent for Liverpool and Manchester, Mr. E. Part, 11, Atherton's-buildings, Dale-street, Liverpool.

ATKINSON'S CEMENT.—The public is respectfully informed, that the price of this very excellent Cement, which has now been in use for Architecture and Engineering works upwards of thirty years, is reduced to 2s. 3d. per bushel, and may be had in any quantity at Wyatt, Parker, and Co.'s Wharf, Holland-street, Surrey side of Blackfriars-bridge.

N.B.—This Cement, being of a light colour, requires no artificial colouring or painting, and may be used for stucco with three parts its own quantity of sand.

TO ENGINEERS, ARCHITECTS, AND BUILDERS.

PATENT METALLIC SAND CEMENT. —The Metallic Sand, from its chemical qualities, forms, when mixed with blue lias lime, a metallic cement of great strength and density; the iron, which is one of its principal constituents, combining with the bed in which it is deposited, and communicating to it a greater degree of hardness than can be obtained by admixture with any other known material. Concrete and mortar in which the metallic sand has been used are more durable than any other, continuing to indurate with time, and not being affected by damp, otherwise than by increasing in hardness from the oxydation which is thereby occasioned. Employed as a cement to turn water from brickwork in tunnels, sewers, and other underground works, the Metallic Sand is found cheaper, and from its eminent adhesive qualities to form a more solid and hydraulic body, in combination with the brickwork, than any other cement at present known; and in all cases the Metallic Sand is found the best substitute for pozzolano that has ever been presented to the public. As an external stucco, the Metallic Cement assumes a rich stone-colour without the aid of paint or tint of any kind, does not vegetate, and is entirely free from cracks and blisters, and continues to improve both in appearance and durability by exposure to the weather. The Proprietors refer with confidence to works in which the Metallic Sand has been extensively employed as concrete and mortar, specified in the prospectus, where also will be found references to very extensive erections which have been stuccoed with the Metallic Cement.

Further information will be given, and specimens shewn, on application to Mr. C. K. Dyer, 4, New Broad-street; and at the Metallic Cement Wharf, King's-road, opposite Pratt-street, Camden New Town.

KEENE'S PATENT MARBLE CEMENT.—The Patentees of this composition beg to refer to the British Museum, the Royal Exchange, the new works at Bethlem Hospital, Greenwich Hospital, and the Coliseum in the Regent's-park, as buildings finished or in progress, in which Keene's Cement has been used as an internal stucco. Its superiority to common plastering consists in its extreme hardness and the rapidity with which it dries, which qualities fit it to receive paint or other finishing sooner than other water Cement.

When employed for skirtings, architrave, and other mouldings, in place of wood, it checks dry-rot, is impervious to vermin, prevents the spread of fire, and is more economical in its application than the material for which it thus becomes the substitute.

Confirmation of these statements is to be found in the almost universal adoption of Keene's Cement for Skirting and Hall flooring in the new houses on the Hyde Park Estate, where its application is to be seen to the fullest advantage.

In Liverpool and Manchester, Keene's Cement has in several cases been used for the covering of the fire-proof warehouse floors, where its lightness and hardness give it the preference over tiles and flagging, which are much heavier, and necessarily leave the floor intersected with numerous joints, whilst Keene's Cement is laid down in one unbroken surface.

The high polish and marble-like hardness of which this Cement is susceptible render it the most suitable material for the manufacture of Scagliola.

Patentees, J. B. WHITE & SONS, Millbank-street, Westminster, Manufacturers of Roman and Portland Cement.

Depôt in Liverpool, 36, Seel-street; James Woods, Agent.

TO ARCHITECTS, ENGINEERS, CONTRACTORS, BUILDERS, MASONS, AND PLASTERERS, MERCHANTS, SHIPPERS, AND THE PUBLIC IN GENERAL.

JOHNS and CO.'S PATENT STUCCO CEMENT.—The following are the positive advantages possessed by this Invention over every Cement hitherto introduced:—It will effectually resist Damp. It will never vegetate nor turn green, nor otherwise discolour. It will never crack, blister, nor peel off. It will form a complete Stone casing to any Building covered with it. It so closely resembles Stone that it is impossible to detect it. It never requires either to be painted or coloured. It will keep fresh and good in the cask in any Climate for any number of years. It is the only Cement that can be depended upon for export. It is the only Cement that can be used with confidence by the Sea-side. It may be used in the hottest or coldest Climates at any season. It will adhere to any substance, even to Wood, Iron, or Glass. It will carry a larger Proportion of Sand than any other Cement. It matures by age, and becomes perfect when other Cements begin to perish. It may be worked through the Winter, as frost has no effect upon it. It may be used on the Inner Walls of new Houses, which may be papered over or painted directly. Roofs laid or pointed with this Cement will remain undamaged by the severest Storms. Any Plasterer may apply it, the Instructions for use being very clear and distinct. The first cost of this material does not exceed that of the cheapest Cement now in use; but with all the above-named extraordinary and valuable advantages, nothing can approach it in point of economy.

Architects and Builders who have used this Cement have declared that it requires only to be known, to be universally preferred.

Specimens may be seen, and a Prospectus fully describing the Cement and its mode of application, together with a volume of Testimonials from every part of the Kingdom, may be obtained on application to MANN and CO., SOLE AGENTS for the Patentees, 8, Maiden-lane, Queen-street, Cheapside, London: of whom also may be had,

JOHNS and CO.'S PATENT STONE-COLOUR STUCCO PAINT, expressly intended for Painting over exterior Walls of Houses that have been covered with Roman or other Cements, and which have become dirty and discoloured. It is in every way better suited for this purpose than White Lead Paint, which will frequently come off in flakes; being in direct chemical opposition with Cement; whereas MESSRS. JOHNS and CO.'S PATENT PAINT having an affinity for Stucco, binds itself with it, stopping the suction, thereby rendering the wall proof against weather, and in the finish producing a pure stone-like effect, produceable by no other Paint whatever. It is cheap in its application,—and may be used by any Painter, in any climate, even in the most exposed Marine situations.

PUBLICATIONS.

Just published, price 5s., neatly bound in roan, with tuck, gilt edges, and lettered, a Pocket Edition of

A CYCLOPÆDIA of the NEW METROPOLITAN BUILDINGS ACT, together with the Act itself, a Folio Table of the Metropolitan Districts (old and new), a List of the Surveyors, with their Residences and Offices, and a Table of Fees to be paid to the Registrar for services performed.

In the Cyclopædia all the details of the Statute are arranged Alphabetically, so as to be instantly found, and accompanied by extensive references and counter-references to the sections of the Act itself and its minute provisions.

By the late A. BARTHOLOMEW, Esq., F.S.A., Architect, Surveyor of the Hornsey District.

Published at the Office of "The Builder," 2, York-street, Covent-garden; and to be had of all Booksellers.

Just Published, a New Edition, Price 4s.

LAXTON'S BUILDERS' PRICES, containing the alteration of the prices in the GLAZIER in consequence of the remission of the duty. A Tariff of Plate Glass is given, shewing the prices of plates from 12 by 12 to 84 by 140 inches. This work contains nearly 11,000 PRICES and MEMORANDA, and the whole of the new Metropolitan Buildings Act.—To be had at the office of "The Civil Engineer and Architect's Journal," 145, Strand; Weale, High Holborn; and Simpkin and Marshall, Paternoster-row.

. The new prices of the Glazier, price 6d. can be had separately.

THE ART-UNION, Monthly Journal, for June, contains a Critical Notice of the Exhibition of the Royal Academy, with Remarks on between four and five hundred of the Works of Art therein contained, and serving as a Guide to the Visitor.

The Art-Union also contains a Series of Twelve Large Woodcuts, illustrative of a Visit to the Louvre, being copies of the best pictures contained in the Salon, 1845.

Also, an Example, beautifully executed in Lithography, of the School of France.

Also, four pages of Engravings, from the Shakspeare Illustrated, by Kenny Meadows.

Also, an Illustrated Essay on Head-dresses in England, from the earliest times.

And also sundry engravings, illustrative of the Progress of Manufactures in England.

May be obtained of the publishers, Chapman and Hall, 186, Strand; S. Clarke, publisher, 13, Pall-Mall East, opposite the Royal Academy; or by order of any Bookseller.

ANALYSIS OF GOTHIC ARCHITECTURE.

This day is published, No. 12, containing five plates, imperial 4to., and a List of Subscribers; price 2s. 6d.

AN ANALYSIS of GOTHIC ARCHITECTURE. By RAPHAEL and J. ARTHUR BRANDON, Architects.

The object of this work is to illustrate in a practical manner the various features of Ecclesiastical Architecture, including roofs, metal works, &c., &c.

Pelham Richardson, 23, Cornhill; and all Booksellers.

Review.—"This work contains five excellent plates in fine Lithography, which are well and professionally got up, with every requisite section of moulding and plan and details."—The Ecclesiologist.

"A cheap and valuable periodical."—F. A. Paley's Guide to the Churches round Cambridge.

THE CHEAPEST ILLUSTRATED PUBLICATION IN THE WORLD.

Yesterday was published, price One Penny, with Numerous original Woodcuts, No. 13 of

THE LONDON JOURNAL, and Weekly Record of Literature, Science, and Art. CONTENTS:—1. Narrative of an Arctic Voyage—2. Disraeli's New Work—3. Etiquette for the Million, by G. W. M. Reynolds—4.
